

28th May 2009

Atma Environmental Pty Ltd
6/ 83 Dover St
Richmond, VIC 3121

Attn: Glenn Berry, Director

Dear Glenn,

As we discussed yesterday there may be another client calling you to discuss a site requiring your services for a site in Ivanhoe which I have referred to you.

I have been very pleased with your company's contribution to a number of my previous and ongoing projects. These were medium to large scale projects and have included a former service, an industrial factory and a site adjacent to a landfill. All were (or are) intended for residential use and all required detailed environmental assessment to satisfy Contaminated Land Audits.

Each site involved specific challenges such as: undisclosed tankage, off-site groundwater contamination, former quarry fill to depth, or methane potential. Atma Environmental showed great responsiveness in dealing with the surprise issues as they arose and were generally very effective at completing the projects including the initial and detailed site investigations, remediation, project management and reporting in a very satisfactory way.

I am impressed by the timely and cost effective working manner of Atma Environmental, while still providing attention to detail and experienced technical advice in a friendly personal way that meets our needs.

I look forward to continuing our strong business relationship.

Best regards,

Daniel Caspar
