Dear Glenn

**95-103 JOHNSTON STREET, FITZROY
ENVIRONMENTAL CONSULTING**

We would like to thank Atma Environmental for its recent efforts and the effective delivery of your environmental contamination assessment services for our recent project – our supermarket development site in Fitzroy.

As you know, we were working under a tight timeframe leading up to Christmas, and not only did your team respond in a very timely manner, but we were really impressed by the attention to the task, the professional knowledge and capacity evident to identify and resolve the issues involved as we moved through the project to clean-up of the site.

The technical expertise demonstrated was excellent as was the ongoing communication with us over the course of the project, which greatly assisted us to make informed decisions along the way. This further demonstrated to us the strong professionalism with which Atma Environmental operates, and the final report you provided (in a timely manner) confirmed that.

Again, thank you, and we will be pleased to work with you again at the next opportunity.

Yours faithfully
ICON CONSTRUCTION AUSTRALIA PTY LTD
